2014 Occupational Employment and Wage Estimates - ii

### Introduction

Each year, the Employment Security Department's Labor Market and Performance Analysis office compiles occupational employment and wage estimates for Washington state. The data are presented statewide, for Metropolitan Statistical Areas, (MSAs) for Metropolitan Divisions (MDs) and for balance-of-state areas. All data are at the cross-industry level.

Occupational Employment Statistics (OES) is a program of the U.S. Department of Labor, Bureau of Labor Statistics. This federal-state cooperative program produces employment and wage estimates for nearly 840 occupations. National estimates, state estimates and more information about the program are available online at www.bls.gov/oes.

### Notes on estimates

These occupational employment and wage estimates are based on the spring 2013 Occupational Employment Statistics survey. The survey collected employment counts and wages from more than 4,900 Washington state employers. Data from the spring 2013 survey were combined with the fall 2010, spring 2011, fall 2011, spring 2012 and fall 2012 survey panels to create a sample size of more than 35,000 employers. Wage estimates were updated to a March 2014 level using Employment Cost Index (ECI) factors. Employment estimates are benchmarked to an average of November 2012 and May 2013 employment.

Occupation and wage estimates are not provided for farms, the self-employed, owner/partners in unincorporated firms, the military, household workers or unpaid family workers. Estimates for some occupations or wage levels are not listed due to small sample size. These include occupations with an estimated employment of fewer than 10 people.

## Definitions

25th Percentile – Twenty-five percent of all wage earners earn below the wage rate specified.

**50th Percentile** – Fifty percent of all wage earners earn below the wage rate specified. The 50th percentile is the median wage.

75th Percentile – Seventy-five percent of all wage earners earn below the wage rate specified.

Annual wage – In instances where hourly rates are reported, the annual wage is calculated by multiplying the hourly rate by 2,080 hours. This is the annual equivalent of working full-time at 40 hours per week.

Average wage – The sum of all reported wage rates divided by the number of rates.

**Balance-of-state area (BOS)** – One of four groups of counties in Washington state not included in a metropolitan statistical area. Each county group is considered economically related.

**Employment cost index (ECI)** – The employment cost index measures changes in wages, salaries and benefits for civilian workers. This includes private industry and state and local government. The ECI is published by the federal Bureau of Labor Statistics and can be found at http://stats.bls.gov/ncs/ect/.

**Metropolitan Division (MD)** – A county or group of counties that serve as a distinct employment region within a metropolitan statistical area that has a population of at least 2.5 million people.

Metropolitan Statistical Area (MSA) – A county or group of counties that are economically related having a principal city or urbanized area with a population of at least 50,000 people. A MSA may include contiguous counties from neighboring states and is also called a metro area.

**Standard Occupational Classification (SOC)** – The SOC system is used to sort and define nearly 840 occupations. The standardized system allows comparable research and reporting by individual states and the federal government. For more information on the SOC system, go to www.bls.gov/soc.
