

Unemployment Insurance Trust Fund Forecast September 2014

Executive summary

This report provides the status and updated projections of the state's unemployment insurance trust fund for 2014 through 2021.

Over the past 10 years, Washington's governor and legislature have worked together in a bipartisan manner to develop a stable unemployment insurance tax and benefit system to sustain the state through difficult economic times. Because of this, Washington's trust fund remained solvent while 36 other states exhausted their trust funds and were forced to secure loans from the federal government to maintain unemployment insurance benefits. And Washington's average unemployment tax rate dropped from 2nd-highest in the nation in 2007 to 21st-highest at the beginning of the year.

Contents

This report contains the following items:

- Employer contributions, benefit payments and projected trust fund balance through 2021;
- September 2014 forecast compared to the June 2014 forecast;
- Appendix 1: Economic assumptions for the September 2014 forecast compared to the June 2014 forecast; and
- Appendix 2: States with outstanding loans from the Federal Unemployment Account. If you have any questions or concerns, please contact Cynthia L. Forland, Director, Labor Market and Performance Analysis at 360-407-4503 or at cforland@esd.wa.gov.

Introduction

This report provides information on Washington state's employer contributions, benefits and unemployment trust fund current and projected balances. The Employment Security Department's unemployment trust fund projections are reviewed and adjusted several times a year. The adjustments are made by changing several variables in the trust fund model, which are derived from the state's Economic and Revenue Forecast Council's (ERFC) quarterly economic forecast, IHS Global Insight and updated unemployment insurance recipiency rates, and by replacing forecasted data with the most current actual data.

This forecast uses the September 2014 ERFC, September 2014 IHS Global Insight assumptions and actual unemployment insurance tax and benefit data through June 30, 2014. The economic assumptions used for this forecast and the June 2014 forecast are provided in *Appendix 1*.

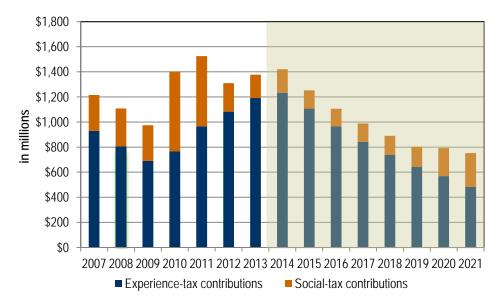

Employer contributions

Employer contributions were about \$1.38 billion in 2013 and are projected to be approximately \$1.42 billion in 2014. Because each year's experience-rated taxes are based on the benefit payments of the previous four years, we continue to see the impact of the recession's high benefit payments. Beginning in 2015, we see employers' taxes decreasing each year through 2021.

Figure 1 shows projected annual employer experience-rated and social cost contributions through the end of 2021.

Figure 1. Washington state unemployment insurance employer contributions Washington state, 2007 through 2021

Source: Employment Security Department/LMPA/ETA 2112/UI Wage File

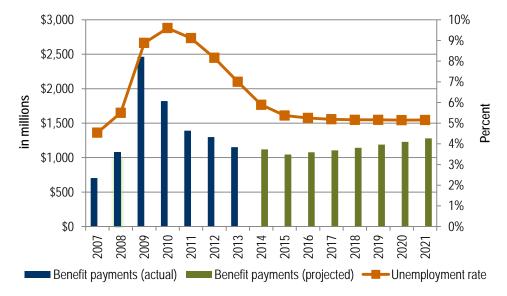

Note: Highlighted years reflect projected data.

Employer contributions were about \$1.38 billion in 2013 and are projected to be approximately \$1.42 billion in 2014.

Unemployment benefit payments

Benefit payments from the unemployment trust fund were approximately \$1.15 billion in 2013 and are projected to be approximately \$1.12 billion in 2014. *Figure 2* shows annual projections of benefit payments from the trust fund and the projected state unemployment rate through 2021. Federally funded benefits such as emergency unemployment compensation (EUC) and extended benefits are excluded from *Figure 2*.

Figure 2. Benefit payments from state unemployment trust fund Washington state, 2007 through 2021 Source: Employment Security Department/LMPA/ETA 2112/UI Wage File

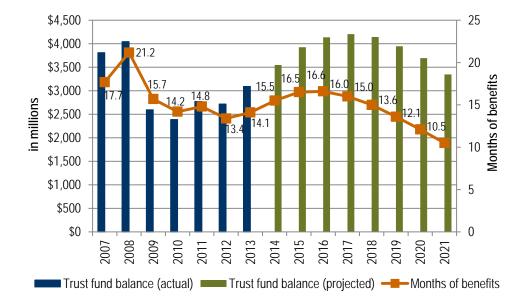

Benefit payments from the trust fund were approximately \$1.15 billion in 2013 and are projected to be approximately \$1.12 billion in 2014.

Trust fund balance

As of September 30, 2014, Washington state had \$3.3 billion (approximately 15.5 months of benefits) in the unemployment trust fund.

Figure 3 below shows the annual projected year-end trust fund balance through 2021. The solid orange line represents the months of benefits available on the date when unemployment insurance tax rates for the following year are calculated (September 30). It is important to note that individual years can have the same trust fund balance, but different months of benefits. There is not one standard cost for a month of benefits; this is seen in Figure 3 below where 2017 is projected to have fewer months of benefits but a higher trust fund balance than 2015 and 2016. The cost of a month of benefits varies depending on how many people in the state are working and how much they are earning.

Figure 3. Washington state unemployment trust fund and months of benefits Washington state, 2007 through 2021 Source: Employment Security Department/LMPA/ETA 2112/UI Wage File

The trust fund balance was at 14.1 months of benefits at the end of 2013 and is projected to reach 15.5 months of benefits by the end of 2014.

Trust fund scenario: September 2014 forecast compared to June 2014

This scenario compares the September 2014 forecast (top) to the published June 2014 forecast (bottom).

Note: The total average tax rate cannot be reached by adding the average experience-tax rate and the flat social-tax rate due to social-tax caps and other factors.

Appendix 1: Economic assumptions

The events since the last forecast have made little impact toward the state's Economic and Revenue Forecast Council's outlook for the future. Overall, revisions to the current economic forecast call for a more optimistic outlook.

The Employment Security Department's unemployment trust fund projections are reviewed and adjusted several times a year. The adjustments are made by changing several variables in the trust fund model, which are derived from the Economic and Revenue Forecast Council's quarterly economic forecast, IHS Global Insight and updated unemployment insurance recipiency rates, and by replacing forecasted data with the most current actual data. *Figure A-1* shows the major economic inputs used in the trust fund model with a comparison to the prior forecast.

Figure A-1. Washington state economic and revenue projections Washington state, September 2014 and June 2014 Source: Washington State Economic and Revenue Forecast Council/IHS Global Insight

Unemployment rate (percent of workforce)				
Year	Sept-14	Jun-14		
2013	7.00%	7.00%		
2014	5.89%	6.10%		
2015	5.37%	5.80%		
2016	5.25%	5.71%		
2017	5.19%	5.71%		
2018	5.16%	5.70%		
2019	5.16%	5.71%		
2020	5.15%	5.21%		
2021	5.15%	5.28%		

Employment growth (percent growth)				
Year	Sept-14	Jun-14		
2013	2.40%	2.40%		
2014	2.60%	2.30%		
2015	2.00%	2.00%		
2016	1.90%	1.90%		
2017	1.40%	1.50%		
2018	1.30%	1.30%		
2019	1.20%	1.10%		
2020	0.86%	0.75%		
2021	0.56%	0.34%		

Personal income (percent growth)					
Year	Sept-14	Jun-14			
2013	3.20%	3.20%			
2014	4.70%	4.40%			
2015	4.80%	5.20%			
2016	5.80%	5.70%			
2017	6.00%	5.70%			
2018	5.50%	5.40%			
2019	5.40%	4.20%			
2020	5.01%	4.98%			
2021	4.75%	4.68%			

Consumer Price Index (percent growth)					
Year	Sept-14	Jun-14			
2013	1.50%	1.50%			
2014	1.80%	1.90%			
2015	1.30%	1.80%			
2016	1.50%	1.30%			
2017	1.80%	1.60%			
2018	1.80%	1.70%			
2019	1.70%	1.50%			
2020	2.21%	2.07%			
2021	2.26%	2.16%			

Definitions of economic variables:

- Unemployment rate: The rate computed by dividing total unemployed by the civilian labor force. The unemployment rate is used as an input into the forecasting of benefits. These unemployment rates are seasonally adjusted. Seasonal adjustment smoothes out the impact of normal seasonal patterns that occur year after year, such as strong seasonal hiring in retail trade around the holidays.
- Wage and salary disbursements: This component of personal income consists of the
 monetary remuneration of employees. It reflects the amount of wages and salaries
 disbursed, but not necessarily earned, during the year. This component is
 measured before deductions, such as Social Security contributions and union dues.
 The percentage growth for wage and salary disbursements is used in projecting
 future wages.
- Employment growth: The percentage change in overall employment from year to year. Employment growth is used in the trust fund model as a means of forecasting total employment.
- Consumer Price Index (CPI): A measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. CPI is used in the forecast as a means of adjusting the dollar values.

Appendix 2: States with outstanding loans from the Federal Unemployment Account

A total of 36 states/territories have exhausted their trust funds and secured loans from the Federal Unemployment Account during this recession. At their peak, those loans exceeded \$47 billion. Currently, 11 of these states and one territory continue to have outstanding federal loans. The amount recently borrowed or repaid is listed under "Change since" in the table below.
